📍 Trivandrum, Kerala | 🔗 linkedin.com/in/dit-rs/

Skills

Back-end: Java, Spring Boot, Microservices, SQL, JMS, Rest API, Kafka, Tibco EMS, NoSQL, Maven, Gradle

Front-end: MEAN, JavaScript, TypeScript, HTML/CSS, Bootstrap

Tools: Git, Jenkins, Bit-Bucket, Black Duck, Seeker, Tableau, Informatica, Docker, Tomcat, Postman, Putty, DBeaver, IDEs

Others: CI/CD Pipelines, Agile Development, Debugging, Problem Solving, Prompt Engineering

Work Experience

IBM, Kochi

August, 2025 - Present

Application Developer (Freedom Mortgage, Oct '25 - Present)

- **Conducted technical feasibility analysis, effort estimation, and migration planning for transitioning PDF processing from iText to Datalogics**, including required code changes; built a proof-of-concept sample project and created reference documentation/code to enable smooth migration for teams.
- **Contributed to application development using Java, Spring Boot, Angular** implementing features and maintaining existing modules.
- **Gained hands-on experience with Terraform scripts and AWS SQS, ECS, S3, Lambda, and CloudWatch** for building, deploying, and monitoring cloud-native services.

TATA Consultancy Services, Trivandrum

July, 2021 - August, 2025

Java Full stack Developer (Systems Engineer)

- **Led a team of five, overseeing the design, development, and deployment of Full-Stack applications** with an emphasis on back-end that consistently exceeded client expectations, ensuring timely delivery of quality software.
- **Optimized and migrated applications to the cloud**, cutting operational costs by about 40% and boosting performance by 15%, implemented automation and monitoring strategies to improve efficiency and system reliability.
- **Enhanced security** by identifying and resolving vulnerabilities using Synopsys tools like Black Duck and Seeker, strengthening overall application protection.
- **Integrated messaging services** (Apache Kafka, TIBCO EMS, Azure Service Bus) to enable seamless inter-application communication, improving reliability and scalability.
- **Configured CI/CD pipelines** using Jenkins to automate builds and deployments, streamlining the release process.
- Java, Spring boot, microservices, React, SQL Server, PostgreSQL, Docker, Azure VMSS, Jenkins, Git, Angular, JS, TS, HTML/CSS

Education

Mar Baselios College of Engg & Tech (Autonomous)

Aug 2017 - Jul 2021

B.Tech in Mechanical Engineering

79.9%

Project Work

Engineering Project

Analysis of CO2 Reduction From IC Engines Using Zeolites With OpenMD

- Conducted analysis on the feasibility of Carbon dioxide emission reduction from IC Engines using Zeolites, with the help of OpenMD, which is an open source molecular dynamics engine.
- Performed complex calculations and simulations using Python.
- Published the analysis paper:
 - Publisher: *Springer nature*
 - Book: *Advances in Multidisciplinary Analysis and Optimization*.
 - Chapter Title: *Molecular Dynamics of Carbon Capture from the Emissions of an IC Engine Using ZSM-5*.

Self-Projects

- Developed an E-Commerce application from scratch using MEAN Stack, with token authentication and admin sign-in options which helps in managing and tracking orders.
- Built backend for an E-commerce application with Java, Spring boot and Microservices.
- Todo application, with dynamic background and reminder functionalities using Java, Spring boot and Angular.
- Constructed an Employee Management Application using MERN Stack.

Awards and Certificates

- Completed Angular Developer Certification from Edureka, with Grade A.
- Successfully finished TCS training programs such as '*Digital: AWS Cloud Computing Intermediate*', '*Wings: Core Tech T1 Building Modern Web Apps at Scale*' and '*Wings: Core Tech Wings1T13 Data Engineering & Data Visualization*' with certificate.
- Pursued Udemy courses to enhance my skills, including '*Java Data Structures & Algorithms + LeetCode Exercises*' by Scott Barrett, '*The Complete Angular Course: Beginner to Advanced*' by Mosh Hamedani, and '*The Web Developer Bootcamp 2025*' by Colt Steele, among others.

Extracurricular Activity

Make A Difference (MAD)

Volunteer

- Volunteer at MAD, an NGO focused on the education of Children in Need of Care and Protection. I am responsible for teaching, fund raising & other activities that support the children.

Other Interests

- Designing (crafts, web pages etc).
- Emerging new technologies in the fields of Electronics, Automobiles, AI.
- Reading, Writing, Drawing.
